

THARINDI JAYAWICKRAMA

Junior Software Developer | React Development | Quality Assurance

LinkedIn: tharindi-jayawickrama-36314a366

GitHub: TharindiJay2002

PROFESSIONAL SUMMARY

IT-focused junior developer with one year of fictional hands-on experience building React interfaces, integrating REST APIs, and supporting software quality assurance. Demonstrated experience with manual testing, bug reporting, automated test scripts, and collaborative Git workflows.

TECHNICAL SKILLS

Frontend:	React, JavaScript, TypeScript, HTML5, CSS3, responsive UI
Backend & Data:	Node.js, Express.js, REST APIs, PostgreSQL, MongoDB, SQL
Testing / QA:	Manual testing, test cases, regression testing, Postman, Selenium, Pytest
Tools:	Git, GitHub, VS Code, Jira, GitHub Actions, Agile / Scrum

PROFESSIONAL EXPERIENCE

Junior Software Developer

Oct 2025 - Sep 2026 | 1 year

Sample Software Studio (fictional employer) | Hybrid

- Built reusable React components for internal dashboards, forms, and responsive client-facing pages.
- Integrated REST APIs with React screens; used Git pull requests and code reviews to deliver features.
- Created manual test cases, ran smoke and regression tests, and tracked defects in Jira.
- Used Postman to validate API responses and collaborated with developers to reproduce and resolve bugs.

SELECTED PROJECTS

01 Property Maintenance Dashboard

React | JavaScript | REST APIs | PostgreSQL

- Built a responsive dashboard with status cards, searchable tables, role-based UI and API-driven views.
- Validated form inputs and tested key user journeys; documented issues and retested fixes.

02 E-Commerce QA Automation Suite

Python | Selenium | Pytest | Postman

- Designed automated browser tests for login, product search, cart and checkout workflows.
- Prepared test cases, reported reproducible defects and organized regression testing results.

03 Student Task Tracker

React | Node.js | Express.js | MongoDB

- Developed a full-stack application with task CRUD, user authentication and REST endpoints.
- Implemented reusable React forms and verified API responses using Postman.

EDUCATION

BSc in Information Technology | Example Institute of Technology (fictional)
